DIGITAL

6 YEAR WARRANTY

FOR OUTDOOR PERIMETER PROTECTION

EXTREME SECURITY

V 1.0

SINCE 1974

ALL WIRES, TRANSFORMER AND BATTERY BACK-UP ARE HIDDEN AND PROTECTED INSIDE THE UNIT

Coral Plus is a digital microwave barrier for protections up to 220 m. It makes easy and quick the installation phases thanks to particular care to the structure and adjustment elements.

Sensitivity setting has been simplified providing **10 selectable configuration steps** with 10 different reaction mode.

Coral Plus includes an **on-board** electronic tool for the **evaluation of the alignment accuracy**, an integrated audible signal and a walktest function.

IP-DOORWAY

<•••> IP-READY PoE

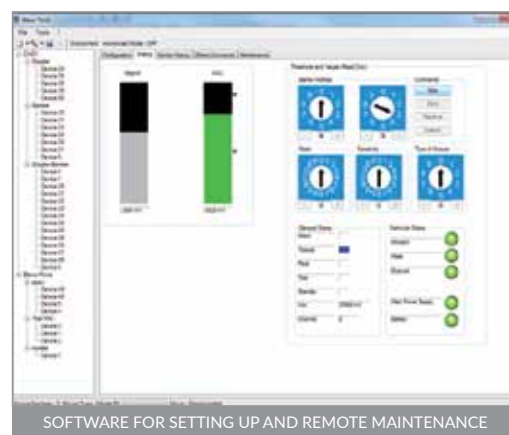

IP-Doorway is an interface designed to make all the CIAS digital detectors "IP-ready".

It immediately becomes clear that there is a significant economic advantage to the installer as, using a single cable, means that almost anything can be implemented with ease.

The product can also be powered using the PoE 802.3AF standard.
