

# CORAL PLUS

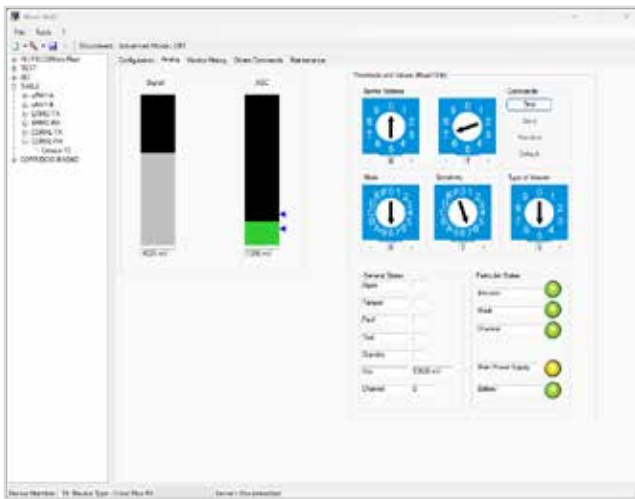

DIGITAL MICROWAVE BARRIER 120M AND 220M

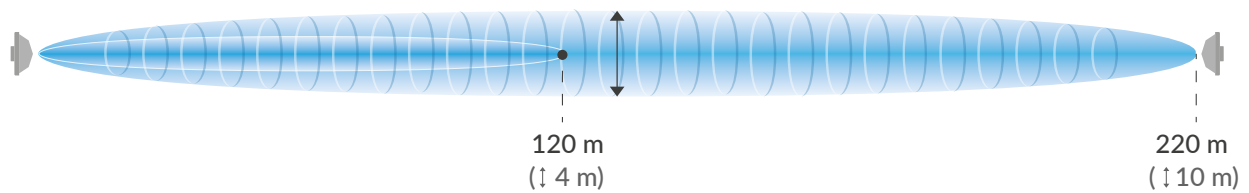

Coral Plus is a digital microwave barrier for perimeter protection, available in two models: 120m and 220m. It simplifies and accelerates installation thanks to its unique internal wiring and easy configuration. Sensitivity settings have been streamlined, offering 10 configuration options with 10 selectable behavior patterns.

Coral Plus includes an onboard electronic tool for alignment accuracy assessment, an integrated acoustic signal, and a walk-test function.
